

Environmental Statement

Our Vision

Portland Color strives to offer ever-greener options to our clients and continually discover the most sustainable processes and materials technologically available. Portland Color evaluates the Life Cycle of our printing projects to reduce our environmental impacts. We look at materials, product manufacture, distribution, use, and waste. We have implemented an Environmental Management System (EMS) to improve the environmental aspects and impacts of our operations to ensure that our customers receive high quality printing that has a minimal impact on the environment.

Our Mission

Portland Color is committed to being a leader in environmentally sound practice in our industry. We will continually explore and implement improved designs, products, and processes to reduce our environmental impact. By so doing, we will benefit our company, clients, vendors, our community, nation, and our world.

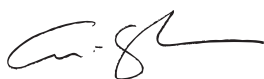

Sustainability at Portland Color

"We have a complete and utter commitment to sustainability. It is, simply, the right thing to do." Andy Graham, Founder

Sustainability at Portland Color is a continuous process of research, self-examination, and improvement. To that end Portland Color continually seeks opportunities to reduce the environmental footprint of our activities in the following areas:

- Material selection
- Manufacturing of printing projects
- Investment in energy efficient equipment and cleaner ink technology
- Recycling and re use of as much material we can
- Building operations
- Packaging and transportation

Portland Color is in compliance with all environmental, health and safety requirements, and is committed to continuous improvement in addressing all environmental, health, and safety issues, whether or not required by regulation. We attend conferences, hire experts, and read literature to assure that we stay current with the best practices available.

Andy Graham, Founder

PORTLAND COLOR... INNOVATION, ARTISTRY, SUSTAINABILITY
